

## What Makes VA's National Oncology Program (NOP) Unique?

- Creating one of the largest integrated cancer research-to-practice learning networks
- Providing critical insights for cancer researchers through expansive data repositories
- Bringing precision oncology to every Veteran, no matter where they live

“

*Using research and genetic testing data, we have more options to better match each patient with their optimal cancer treatment.*

**Dr. Drew Moghanaki**  
VA Radiation Oncologist

**300+** ongoing oncology  
research projects

VA has been funding internal  
cancer research projects since **1932**

VA has enrolled **MORE THAN 830,000 VETERANS** in VA's Million Veteran Program (MVP) to better understand how genes affect health and illness

## VA's Office of Research & Development (ORD) is:

- Collaborating with federal partners, academic affiliates, and public-private research programs to make VA the best clinical development resource in the world for cutting-edge, best-in-class cancer care
- Finding ways for the growing number of cancer survivors to maintain good health and sustain their quality of life
- Reducing the socio-economic disparities in cancer treatment through the expansion of virtual clinical trials

VA researchers, clinicians, and strategic partners are working shoulder to shoulder to advance cancer research for Veterans. For more information on how VA is driving innovation in cancer research and how you can help, please visit [cancer.va.gov](https://cancer.va.gov), or contact [cancer@va.gov](mailto:cancer@va.gov).
