

VA'S NATIONAL CENTER FOR LUNG CANCER SCREENING

The VA National Center for Lung Cancer Screening (NCLCS) supports systematic, integrated, and equitable access to high quality lung cancer screening processes for Veterans.

The mission of the Center is to reduce lung cancer related mortality and morbidity by leveraging a learning health care system to increase systematic and equitable access to evidence-based lung cancer screening through a collaborative, interdisciplinary network.

NCLCS provides education and support to clinical teams regarding LCS standards of care, VHA policy, best practices, as well as data and policy recommendations to central VA leadership.

Released March 2024

WE ARE EXPANDING VETERANS' ACCESS TO LUNG CANCER SCREENING

200,164 Eligible Veterans were offered
LUNG CANCER SCREENING
GROWING FROM 67,714 in Dec 2021

WE ARE MOVING TOWARDS ADOPTION AT ALL VA FACILITIES

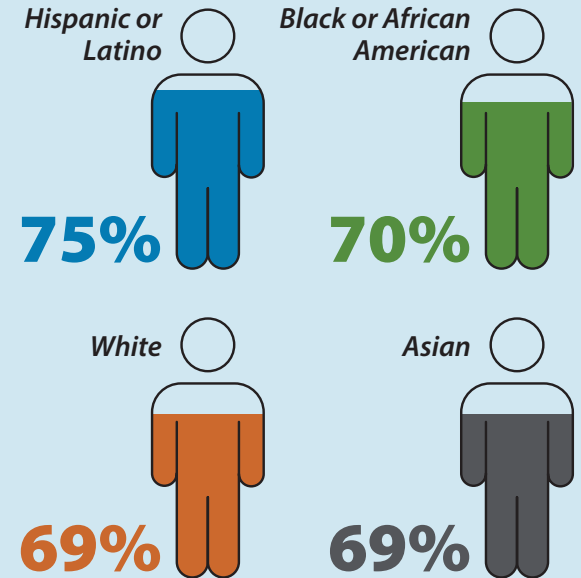

117 SITES are using VA's Lung Cancer Screening Platform (LCSP)...

...a VA-developed, electronic medical record-embedded platform that allows us to identify and manage LCS patients. This is compared to 60 sites Nov 1, 2021.

WE ARE AIMING FOR EQUITABLE ACCESS FOR ALL VETERANS ELIGIBLE FOR LUNG CANCER SCREENING

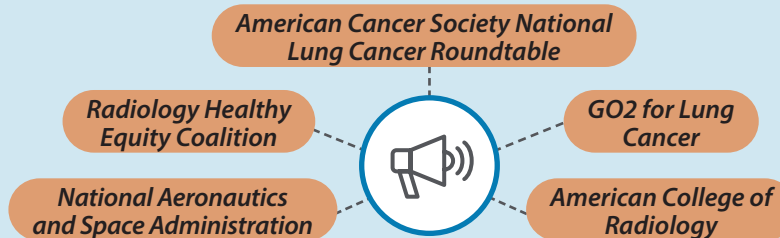

Percentages of eligible Veterans who were offered LCS, by Race/Ethnicity

WE ARE PARTNERING WITH ORGANIZATIONS TO INTEGRATE NEW TREATMENTS AND PROMOTE LUNG CANCER SCREENING NATIONWIDE

Teamed up with **VA's National Tobacco and Health Program Office** to integrate smoking cessation treatment into lung cancer screening

Partnered to **increase awareness** about the importance of lung cancer screening and improved outcomes for Veterans with lung cancer

WE ARE ACHIEVING PATIENT ADHERENCE FOR LUNG CANCER SCREENING

For sites using the LCSP, we are achieving an **82% rate of follow-up adherence**, compared to about **35% in many non-VA facilities**.
